

Cleanlight a proven solution to stop Mildew

“Initially, we treated a few times per week. We saw that we killed some mildew, but we did not reach everything. But after switching to a strict protocol of treatment every day we now reduced our fungicide consumption by 65%. That saves a lot of money and our crop is looking stronger.”

Ravi Patel
Subati Flowers

Situated at the Equator, Subati flowers is a 30 Ha Rose Farm situated in the heart of the Rift valley. They produce and export big head roses and are keen to implement new techniques. UFO SUPPLIES and her agent Hardi Kenya are proud to have customers like Subati and happy to see how this technology helps them in their daily production. It helps them in their mission to grow better flowers using less chemicals. It is better for their workers, their plants and their profitability to grow top quality flowers in a more sustainable and responsible way.

UFO SUPPLIES and Hardi Kenya are proud to have a successful cooperation with pioneers and inventers like Clean Light.
