

RESPIRATORS

FULL FACE MASKS

Information

Before use always check the full face mask. Check rubber that seals the face, check inlet and outlet valve. Dirty valves are crisp and like broken valves should be replaced immediately. Having a beard or wearing glasses breaks the seal of the mask and allows harmful vapours to come in.

All parts of the mask should be cleaned after use with soap water. Do not dip the filters in the water! Let it dry at a well ventilated place but NOT in direct sun light.

Store the mask in a dark closet with all other clean personal safety items. It is preferred to keep the mask in an air tight box.

MOLDEX 9000 FULL FACE MASK

High quality full face mask. Made out of comfortable and durable material. Available in three sizes for best fit.

Should be worn when continuously exposed to a concentration of toxic pesticides. Protects the lungs, eyes, nose and mouth against vapours, fumes, mists and fine dusts, depending on the filter used. All parts can be repaired/replaced.

Moldex EasyLock filter system, two filters a mask.

Filters interchangeable with Moldex 7000 half face mask.

MOLDEX 9000 FULL FACE MASK DIN FITTING

Same mask like above with single DIN Fitting (EN147).

Recommended for farms with large stocks of DIN filters.

3M 7907S FULL FACE MASK

Silicone gas mask should be worn when continuously being exposed to a concentration of toxic pesticides. Protects the lungs, eyes, skin, nose and mouth against vapours, fumes, mists and fine dusts depending on filter used. 3M 7907S is very comfortable to wear, has a light, clear view due to poly carbonate window screen. Easy respiration by double filter system. All parts can be repaired/replaced. Excluding filters, 3M filters only.
