

## AGENT TANZANIA

We are happy to announce our cooperation with Triachem (T) Ltd. serving the horticultural industry as our agent for Tanzania.

Joining forces makes a lot of sense as we can make our products available to all growers direct from stock in Arusha relieving growers from having to import themselves.

Adrian Moss has many years of experience as a grower of Lisianthus and Roses in Tanzania and Kenya and understands the complexity of the industry. He started with Triachem six years ago and has successfully built a sound company with an excellent reputation.

We are very proud to be working with Triachem and trust the cooperation between the two companies will be appreciated by the Tanzanian growers.
