

NIVOLATOR

NIVOLATOR GREEN HOUSE AIR FAN

The Nivolator air fan is a special fan developed for greenhouses. The special shape and vertical mounting creates a homogeneous greenhouse climate without creating draught or air streams.

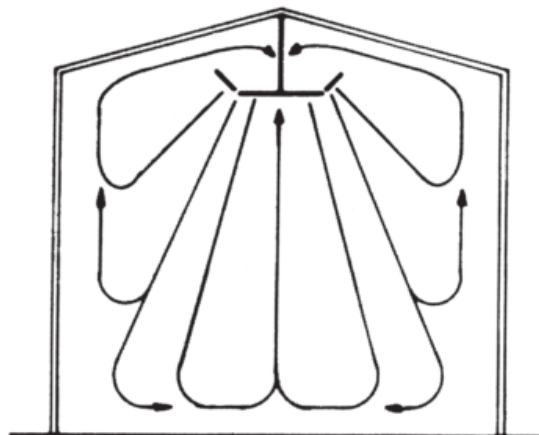

Benefits of the Nivolair air fan:

- Improved ventilation.
- Homogeneous temperature levels throughout the whole greenhouse.
- Homogeneous CO₂ levels throughout the whole greenhouse.
- Less vertical temperature differences.
- No draught
- No dead-air

Technique:

The Nivolator has been designed for use in greenhouses and can stand the different climates. The Nivolator has a special design which creates an ingenious air circulation pattern. 1 unit per 250m² gives the best result.

The Nivolator has a minor energy consumption of 158W and operates on 230V.
The Nivolator has a variable speed.
