

QuickBunch single binding

A revolution in the flower industry. The QuickBunch is the first manual operated binding and cutting machine. Combining two activities in one stroke: binding the bunch and cutting the bunch. Suitable for all types of stems both woody and herbal.

During our farm visits in Africa the idea arose to combine the Attalink binder and a guillotine cutter. Why two separate actions if it could be done in one movement? Our idea for manual binding and cutting in one stroke was born. UFO Supplies contacted Vigouroux, world leader in hand held tying tools with degradable elastic ties, and the started designing the QuickBunch. Its ingenious design, ensures that the cutting and binding can be done faster. The Attalink binder works without electricity. The QuickBunch is equipped with the highest possible quality bunch cutter. The QuickBunch is a real time-saver.

Easy in use, low maintenance and easy to install. With the small QuickBunch, bunches are finished with one simple hand movement up to 3 cm in diameter. The bigger QuickBunch can even handle bunches up to 6cm.

Advantages

- Combines 2 jobs in 1 stroke (binding + cutting)
- Fast
- Reliable
- Easy in use
- No electricity required
- Thread tension adjustable
- Position of string adjustable
- Mountable on any table

Purposes

- binding & cutting mono bunches
- binding & cutting mixed bunches

Users

- large scale flower production farms in Latin America and Africa
- small scale flower production farms
- bouquet makers
- florists

Movie QuickBunch
