

## Florissant 810 super effective for roses

"For a long period we tested different products to keep our roses healthy and hydrated. We were pleasantly surprised by the results of Florissant 810. It really keeps the flowers and foliage in optimal condition. Auction tests have confirmed this, showing extremely low bacteria levels. In the vase the roses retain their original beauty and live longer, this makes us very happy of course. Florissant 810 is the only product for us."

Guido Zwart

Rose Handling Service / Mount Elgon Orchards

Since 2004 Rose Handling Service BV is based on FloraHolland Auction in Rijnsburg and handles 80 million Kenyan roses a year. Mount Elgon Orchards in Kenya grows top quality roses whilst observing the highest level of social and environmental responsibility.

Florissant 810 is a universal rehydration solution for flowers with a soft or woody stems. It lowers the pH which improves the water uptake and vase life. Recommended for roses by the Dutch flower auctions as it keeps flowers and foliage in optimal condition. It is free of aluminium sulphate.
