AFTER SPRAYING CARE INSTRUCTIONS HORTI SPRAY OVERALL

To keep this overall in good condition **rinse after every use**, in order to remove chemical residues.

This Flexothane overall has to be washed as follows:

1. After every day of spraying the person wearing the overall should take a **shower for at least 3 minutes while wearing the overall**. This to ensure all chemical residues are washed off properly before taking off the overall. Gloves and boots also have to be cleaned in this manner. At the same time the impenetrability of the overall, boots and gloves is tested. If a shower is not available, use a hose pipe.
2. Put the clean overall on a hanger in a well ventilated room to dry.
3. The sprayer can now take a shower to wash his body.
4. Never wear a damaged spray overall as it will no longer offer maximum protection. It needs to be replaced or repaired.

Wash at low temperature with restricted movements, in a mild soap, only after rinsing under the shower, once after 6 days of use.

	Do not soak in a bucket after use without having cleaned the outside as described under 1.
	Wash at low temperature with restricted movements, in a mild soap.
	Do not bleach
	Do not iron
	Do not tumble or tunnel dry. Drip dry.
	No chemical cleaning / no dry cleaning
